Coming Out to the Mainstream is a collection of essays written from a range of perspectives, from scholars to film producers, who seek to contextualize and reframe New Queer Cinema from a 21st century perspective—decades after Stonewall, the emergence of the HIV-AIDS crisis, and the initial years of the gay marriage movement. These essays situate themselves in the 21st century as an attempt to assess what appears to be a mainstreaming of New Queer Cinema, a current wave of New Queer Cinema film that holds potential for influencing film viewers beyond the original limits of an independent film audience, critics, and the academy. Specifically, these essays examine whether and how the filmmaking styles and themes of New Queer Cinema have been mainstreamed—rendered familiar as points of interest in popular culture of the 21st century, challenging a queer-phobic cultural climate, and providing an incisive set of visual representations that can help inform continuing debates over queerness in public culture. For instance, what do we make of the burgeoning number of queer stories that are circulating not just in arthouses but in mainstream media? How much of a transformation in our collective sensibilities does this trend represent, and will it carry us toward a cultural landscape where identity is commonly understood and valued as multiple, fluid, and performative? While the editors of this collection find there is significant evidence that New Queer Cinema has achieved success in forging greater mainstream acceptance of queer perspectives in cinema and everyday culture, the essays we present offer a variety of voices, a timely set of observations on queer images in film, television, and popular culture.

Entrepreneurship As Social Change
This book addresses the interconnected issues of public memory, race, and heritage tourism, exploring the ways in which historical tourism shapes collective understandings of America’s earliest
engagements with race. It includes contributions from a diverse group of humanities scholars, including early Americanists, and scholars from communication, English, museum studies, historic preservation, art and architecture, Native American studies, and history. Through eight chapters, the collection offers varied perspectives and original analyses of memory-making and re-making through travel to early American sites, bringing needed attention to the considerable role that tourism plays in producing—and possibly unsettling—racialized memories about America's past. The book is an interdisciplinary effort that analyses lesser-known sites of historical and racial significance throughout North America and the Caribbean (up to about 1830) to unpack the relationship between leisure travel, processes of collective remembering or forgetting, and the connections of tourist sites to colonialism, slavery, genocide, and oppression. Public Memory, Race, and Heritage Tourism of Early America provides a deconstruction of the touristic experience with racism, slavery, and the Indigenous experience in America that will appeal to students and academics in the social sciences and humanities.

Poetry Therapy Just as the previous generation was raised in front of televisions, adolescents at the turn of the 21st century are being raised in an internet-enabled world where blogs, social networking, and instant messaging are competing with face-to-face and telephone communication as the dominant means through which personal interaction takes place. Unfortunately, a small but growing proportion of our youth are being exposed online to interpersonal violence, aggression, and harassment via cyberbullying. The mission of this book is to explore the many critical issues surrounding this new phenomenon. Key features include the following. Comprehensive – The book provides a comprehensive, up-to-date look at the major issues that teachers, school administrators, counsellors, social workers, and parents need to be aware of with respect to cyberbullying identification, prevention, and response. Practical – While the information is informed by research, it is written in an accessible way that all adults will be able to understand and apply. Expertise – Justin W. Patchin and Sameer Hinduja are Co-Directors of the Cyberbullying Research Center (www.cyberbullying.us). Chapter authors represent a carefully selected group of contributors who have demonstrated both topical expertise and an ability to write about the topic in clear, easily accessible language. This book is appropriate for teachers, administrators, parents and others seeking research-based guidance on how to deal with the rising tide of cyberbullying issues. It is also appropriate for a variety of college level courses dealing with school violence and educational administration.

Victimization through the Internet is becoming more prevalent as cyber criminals have developed more effective ways to remain anonymous. And as more personal information than ever is stored on networked computers, even the occasional or non-user is at risk. A collection of contributions from worldwide experts and emerging researchers, Cyber Criminology: Exploring Internet Crimes and Criminal Behavior explores today’s interface of computer science, Internet science, and criminology. Topics discussed include: The growing menace of cyber crime in Nigeria Internet gambling and digital piracy Sexual addiction on the Internet, child pornography, and online exploitation of children Terrorist use of the Internet Cyber stalking and cyber bullying The victimization of women on social networking websites Malware victimization and hacking The Islamic world in cyberspace and the propagation of Islamic ideology via the Internet Human rights concerns that the digital age has created Approaching the topic from a social science perspective, the book explores methods for determining the causes of computer crime victimization by examining an individual’s lifestyle patterns. It also publishes the findings of a study conducted on college students about online victimization. Advances in information and communications technologies have created a range of new crime problems that did not exist two decades ago. Opportunities for various criminal activities to pervade the Internet have led to the growth and development of cyber criminology as a distinct discipline within the criminology framework. This volume explores all aspects of this nascent field and provides a window on the future of Internet crimes and theories behind their origins. K. Jaishankar was the General Chair of the First International Conference of the South Asian Society of Criminology and Victimology (SASCV), held January 15-17, 2011 at the Hotel Jaipur Greens in Jaipur, Rajasthan, India.

Showing Off, distinguished geographer Philip L. Wagner offers a persuasive hypothesis. Drawing on a lifetime of inquiry, travel, and teaching, he asserts that the strive for Geltung—personal standing, recognition, acceptance, esteem, and influence—shapes all of our interactions and defines the unique social character of human beings. Wagner applies the Geltung hypothesis to a wide range of human activities from falling in love and spreading gossip to buying goods and making war. His examples demonstrate how communication and display—"showing off"—impel geographic change, as they reveal how and why people with the most Geltung tend to occupy the most desirable places. This broad vision draws insights from many fields. A major contribution to cultural geography, the book also sheds new light on individual psychology and psychopathology and suggests new themes for cognitive science and even philosophy. Sure to stir lively debate in many circles, it will be provocative reading for everyone fascinated by the continuum between people and places.

This encyclopedia, edited by the past editors and founder of the Journal of Business Ethics, is the only reference work dedicated entirely to business and professional ethics. Containing over 2000 entries, this multi-volume, major research reference work provides a broad-based disciplinary and interdisciplinary approach to all of the key topics in the field. The encyclopedia draws on three interdisciplinary and over-lapping fields: business ethics, professional ethics and applied ethics although the main focus is on business ethics. The breadth of scope of this work draws upon the expertise of human and social scientists, as well as that of professionals and scientists in varying fields. This work has come to fruition by making use of the expert academic input from the extraordinarily rich population of current and past editorial board members and section editors of and contributors to the Journal of Business Ethics.

Adequate access to public goods plays an important role in the economic and rural development of any country. For the transition countries, however, providing public goods is particularly problematic owing to several factors associated with the transition process itself, e.g. economic recession and a change in ownership of local public goods. Taking Russia as an example, this study examines the effect of the transition process on rural household's access to public goods. With reference to education and health care, household access to public goods is addressed in terms of community availability and economic access. The analysis is taken a step further, through an examination of the role of informal institutions in public good provision. Multiple regression analysis was used to test for the significance of income as a determinant of private expenditures on public goods. The results indicate that, contrary to expectations, neither income nor informal payments are important determinants of access to public goods. Informal institutions continue to exert a strong influence on the provision of public goods.

Directory of Members ... a reflective and scholarly work that presents exciting and challenging views to mainstream entrepreneurship. ... The four books comprising the series would certainly be a valuable addition to any entrepreneurship library. However, each book also stands alone as an individual purchase. Lorraine Warren, International Journal of Entrepreneurial Behaviour and Research

The narrative and flow of the book is superb and very interesting to read. The book is well edited and thought provoking which makes it an interesting read. Vanessa Ratten, Journal of Entrepreneurising Communities: People and Places in the Global Economy

This book the third in the Movements in Entrepreneurship series examines entrepreneurship as a societal phenomenon. It provides an in-depth study of the social aspects of entrepreneurship, illustrating how entrepreneurship affects society. The need to move beyond economy to disclose entrepreneurship in its societal forms is demonstrated, as is the relevance of our understanding of entrepreneurship as a societal phenomenon. The contributors show that entrepreneurship is a society-creating force and as such, it evokes new questions for entrepreneurship research and attempts to engage with new theoretical formulations. They begin with discussions on early Schumpeter and a rhetorical analysis of the current academic literature on social entrepreneurship. They go on to present myriad contextual examples of how entrepreneurship can shape social change, and indicate how this is initiated through various social settings, relationships and communities. Through rich empirical work this book explores the social of social entrepreneurship and in doing so shows us how entrepreneurship is at home where society is created. As such, it will prove a fascinating read for academics, researchers and students with an interest in entrepreneurship, sociology and economic sociology.
Coming Out to the Mainstream An Introduction to Crime and Crime Causation is a student-friendly textbook that defines and explains the concepts of crime, criminal law, and criminology. Ideal for a one-semester course, the book compares and contrasts early criminal behavior and today’s modern forms of crime. It also explores society’s responses to criminal behavior in the past and in the present day. It covers both major and lesser-known crime causation theories and their impact on society. Topics covered include: The importance of understanding crime data The goals of punishment The history of criminology, including the influence of social Darwinism on early trait theorists Crime causation theories, including a comparison of mainstream and critical theories The relationship between crime and biology, including the influence of genetics, substance use, and mental illness The social structural approach to crime, including a consideration of the changing contexts of urban criminality The nature and function of the justice system at the local, state, and federal levels, and basic categories of crimes Drug trafficking crimes, drug court efforts, and perceived weaknesses in current antidrug efforts Each chapter begins with a set of objectives and concludes with a summary. Interactive questions promote classroom discussion and practicum sections facilitate contextual learning. Drawn from different and distinct backgrounds, the authors each have unique perspectives on crime, making for a particularly well-rounded text that explores crime from several angles. The book attempts to educate readers in the development of new insights on crime and crime causation and provides a greater understanding of the steps that need to be taken before a significant reduction in crime can occur.

A Unified Theory of Justice and Crime Book Excerpt: relative social positions of man and wife, but the religious reflection of these conditions in the minds of men. Hence Bachofen represents the Oresteia of Aeschylus as the dramatic description of the fight between the vanishing maternal and the paternal law, rising and victorious during the time of the heroes.Klytaemnestra has killed her husband Agamemnon on his return from the Trojan war for the sake of her lover Aegisthos; but Orestes, her son by Agamemnon, avenges the death of his father by killing his mother. Therefore he is persecuted by the Erinyes, the demonic protectors of maternal law, according to which the murder of a mother is the most horrible, inexpiable crime. But Apollo, who has instigated Orestes to this act by his oracle, and Athene, who is invoked as arbitrator—the two deities representing the new paternal order of things—protect him. Athene gives a hearing to both parties. The whole question is summarized in the ensuing debate between Orestes and the Erinyes. Orestes claims that...

Planning Curriculum in International Education International crime and justice is an emerging field that covers international and transnational crimes that have not been the focus of mainstream criminology or criminal justice. This book examines the field from a global perspective. It provides an introduction to the nature of international and transnational crimes and the theoretical perspectives that assist in understanding the relationship between social change and the waxing and waning of the crime opportunities resulting from globalization, migration, and culture conflicts. Written by a team of world experts, it examines the central role of victim rights in the development of legal frameworks for the prevention and control of transnational and international crimes. It also discusses the challenges to delivering justice and obtaining international cooperation in efforts to deter, detect, and respond to these crimes.

Cyberbullying Prevention and Response Updated with recent issues such as the national debate on health care reform, this Second Edition of How Can We Solve Our Social Problems? gives students a sense of hope by demonstrating specific, realistic steps we can take to solve some of the most pervasive social problems in America today. Author James Crone maintains a sense of sociological objectivity throughout and helps students realize that we can take steps to solve such key social problems as poverty, racial and ethnic inequality, unequal education, and environmental issues. The book's first two chapters define "social problem," provide a theoretical background, discuss the daunting barriers we face in attempting to solve social problems, and demonstrate how sociology can help.

Mathematics and Music This book addresses the idea of justice in order to guide society towards a more effective justice system. The authors trace impoverished and accomplished thinking in criminological and justice discourses and show that when justice and love are seen as synonyms, the historic ills that have plagued humanity tend to evaporate.

A Garland of Feminist Reflections

The Face of Emmett Till It is an excellent book – highly intelligent, interesting and original. Expressing high philosophy in a readable form without trivialising it is a very difficult task and McAleer manages the task admirably. Plato is, yet again, intensely topical in the chaotic and confused world in which we are now living. Philip Allott, Professor Emeritus of International Public Law at Cambridge University This book is a lucid and accessible companion to Plato’s Republic, throwing light upon the text’s arguments and main themes, placing them in the wider context of the text’s structure. In its illumination of the philosophical ideas underpinning the work, it provides readers with an understanding and appreciation of the complexity and literary artistry of Plato’s Republic. McAleer not only unpacks the
key overarching questions of the text - What is justice? And Is a just life happier than an unjust life? - but also highlights some fascinating, overlooked passages which contribute to our understanding of Plato’s philosophical thought. Plato’s 'Republic': An Introduction offers a rigorous and thought-provoking analysis of the text, helping readers navigate one of the world’s most influential works of philosophy and political theory. With its approachable tone and clear presentation, it constitutes a welcome contribution to the field, and will be an indispensable resource for philosophy students and teachers, as well as general readers new to, or returning to, the text.

Organizational Behavior Rita M. Gross has long been acknowledged as a founder in the field of feminist theology. One of the earliest scholars in religious studies to discover how feminism affects that discipline, she is recognized as preeminent in Buddhist feminist theology. The essays in A Garland of Feminist Reflections represent the major aspects of her work and provide an overview of her methodology in women’s studies in religion and feminism. The introductory article, written specifically for this volume, summarizes the conclusions Gross has reached about gender and feminism after forty years of searching and exploring, and the autobiography, also written for this volume, narrates how those conclusions were reached. These articles reveal the range of scholarship and reflection found in Rita M. Gross's work and demonstrate how feminist scholars in the 1970s shifted the paradigm away from an androcentric model of humanity and

The What If Theory At first glance, mathematics and music seem to be from separate worlds—one from science, one from art. But in fact, the connections between the two go back thousands of years, such as Pythagoras’s ideas about how to quantify changes of pitch for musical tones (musical intervals). Mathematics and Music: Composition, Perception, and Performance explores the many links between mathematics and different genres of music, deepening students’ understanding of music through mathematics. In an accessible way, the text teaches the basics of reading music and explains how various patterns in music can be described with mathematics. The authors extensively use the powerful time-frequency method of spectrograms to analyze the sounds created in musical performance. Numerous examples of music notation assist students in understanding basic musical scores. The text also provides mathematical explanations for musical scales, harmony, and rhythm and includes a concise introduction to digital audio synthesis. Along with helping students master some fundamental mathematics, this book gives them a deeper appreciation of music by showing how music is informed by both its mathematical and aesthetic structures. Web Resource On the book’s CRC Press web page, students can access videos of many of the spectrograms discussed in the text as well as musical scores playable with the free music software MuseScore. An online bibliography offers many links to free downloadable articles on math and music. The web page also provides links to other websites related to math and music, including all the sites mentioned in the book.

Covers the complete range of the development of theoretical knowledge of the field, from ancient geography to contemporary non-representational theory Presents theories in an accessible manner through the author's engaging writing style Examines the influence of Darwin and Marx, the emergence of anarchist geographies, the impact of feminism, and myriad other important bodies of thought Stresses the importance of geographic thought and its relevance to our understanding of what it is to be human, and to the people, places, and cultures of the world in which we live

Encyclopedia of Business and Professional Ethics Bullying, particularly among school-age children, is a major public health problem both domestically and internationally (Nansel, Craig, Overpeck, Saluja, & Ruan, 2004). Current estimates suggest that nearly 30% of American adolescents reported at least moderate bullying experiences as the bully, the victim, or both. Specifically, of a nationally representative sample of adolescents, 13% reported being a bully, 11% reported being a victim of bullying, and 6% reported being both a bully and a victim (Nansel et al., 2001).

Group Process and Gang Delinquency For decades, poetry therapy has been formally recognized as a valuable form of treatment, and it has been proven effective worldwide with a diverse group of clients. The second edition of Poetry Therapy, written by a pioneer and leader in the field, updates the only integrated poetry therapy practice model with a host of contemporary issues, including the use of social media and slam/performance poetry. It’s a truly invaluable resource for any serious practitioner, educator, or researcher interested in poetry therapy, bibliotherapy, writing, and healing, or the broader area of creative/expressive arts therapies.

Open Technical Communication Despite all of the information that exists to encourage students to attend and do well in college, this is the first research-based guide that directly advises first- and second-year college students. With a focus on the needs and interests of students who are underrepresented in the academy (African American, Latinx, low-income, and first-generation students), this book will help all students take full advantage of the academic resources that the university setting has to offer. The authors introduce students to different types of research across the disciplines, showing them how to work with professors to build a course of study, how to integrate research work into coursework, and how to write and present research. This timely volume will also assist faculty, staff, and parents in providing the needed tools to promote student success. Book Features: Prepares students for the transition from high school to college with a focus on writing, time management, and research skills. Addresses the challenges that face high-achieving, underrepresented students. Empowers students to seek out resources and research opportunities to achieve their full academic potential. Includes models, approaches, student voices, and vignettes from the authors’ successful undergraduate research program. “A must read for every college student. This practical guide provides a roadmap for success as a researcher, a scholar, and a learner.” —Tia Brown McNair, Association of American Colleges & Universities “Faculty mentors and administrative leaders who aspire to be effective sponsors and supporters of students from diverse backgrounds should definitely acquire this resource.” —Elizabeth L. Ambos, Council on Undergraduate Research “What I love about this book is the broader, humanistic conversation about how pursuing research becomes a window into how one becomes a supremely informed and critical citizen.” —Armando Bengochea, director, Mellon-Mays Undergraduate Fellowship Program
