The Archives of the Dutch East India Company (VOC) and the Local Institutions in Batavia (Jakarta)

The contents of this book represent papers which were presented at the Third International Meeting on "Side-Effects of Anti-Inflammatory and Analgesic Drugs" which was held under the auspices of the University of Verona, Institute of Pharmacology in Verona on 8-11 May 1991. This meeting was held in conjunction with the 13th European Workshop on Inflammation and although publications from this part of the meeting are not published here (they appear in
Agents and Actions), we were fortunate in having a group of people interested in inflammation from varying backgrounds. The success of the third meeting followed previous meetings held in Cambridge and Verona respectively and continue a tradition which has now become well established. The meeting brought together physicians, scientists and those concerned with the production and use of anti-inflammatory drugs to a very stimulating conference to discuss basic issues affecting all aspects of side-effects of anti-inflammatory and analgesic drugs as well as their detection and treatment. The meeting was held in the Auditorium of Glaxo Italy and we are very grateful to that company for use of their facilities as well as to the University of Verona, Institute of Pharmacology, for valuable secretarial and administrative help. The success of the conference would not have been possible without valuable financial assistance of the companies listed separately (under Acknowledgements) as well as to the organizers of the 13th European Workshop on Inflammation who collaborated with us.

**Side-Effects of Anti-Inflammatory Drugs 3**

With the resources of both governments and traditional philanthropy barely growing or in decline, yet the problems of poverty, ill-health, and environmental degradation ballooning daily, new models for financing social and environmental objectives are urgently needed. Fortunately, a revolution is underway in the instruments and institutions available to meet this need. Loans, loan guarantees, private equity, barter arrangements, social stock exchanges, bonds, social secondary markets, and investment funds are just some of the actors and tools occupying the new frontiers of philanthropy and social investment. Together they hold the promise of leveraging for social and environmental purposes not just the billions of dollars of charitable grants but the hundreds of billions, indeed trillions, of dollars of private investment capital. While the changes under way are inspiring, they remain largely uncharted. This concise introduction to the topic, and its companion volume, provide the first comprehensive and accessible roadmap to these important advances. In the process, these works will better equip investors, philanthropists, social entrepreneurs, nonprofit leaders, business executives, government officials, and students the world over to capture the opportunities that these developments hold out to them and
Deliberative Policy Analysis

This book is a reprint of Jaap R. Bruijn's 1993 book, The Dutch Navy, which offers an English-language overview of the history of the Dutch Navy in the seventeenth and eighteenth centuries. It is divided into three chronological periods: the 'old', 'new', and 'second-rate' navy. Rather than presenting a history of naval conflict, this volume approaches Dutch naval history from the following four angles: operations, administration, officer duties, and sailor duties. It consists of a series foreword, a new introduction detailing recent developments in naval historiography, the original introduction providing a history of Dutch maritime history from the middle ages to the beginning of the seventeenth century, a conclusion, and a bibliography and index. It explores the astounding amount of naval power belonging to such a sparsely populated nation, plus the rapid rates of success and decline. It confirms that the Dutch navy - with its logic, innovation, and missteps alike - provides an excellent case study of both the development of European bureaucracy and armed forces in the Early Modern period.

PDQ Epidemiology

The resources of both governments and traditional philanthropy are either barely growing or in decline, yet the problems of poverty, ill-health, and environmental degradation balloon daily. It is therefore increasingly clear that we urgently need new models for financing and promoting social and environmental objectives. Fortunately, a significant revolution appears to be underway on the frontiers of philanthropy and social investing, tapping not only philanthropy, but also private investment capital, and providing at least a partial response to this dilemma. This book examines the new actors and new tools that form the heart of this revolution, and shows how they are reshaping the way we go about supporting solutions to social and environmental problems throughout the world. With contributions from leading experts in the field, New Frontiers of Philanthropy provides a comprehensive analysis of the many new institutions that have surfaced on this new
frontier of philanthropy and social investment; the new
tools and instruments these institutions are bringing to
bear; the challenges that these actors and tools still
encounter; and the steps that are needed to maximize their
impact. The result is a powerful and accessible guide to
developments that are already bringing significant new
resources into efforts to solve the world's problems of
poverty, ill-health, and environmental degradation;
unleashing new energies and new sources of ingenuity for
social and environmental problem-solving; and generating new
hope in an otherwise dismal scenario of lagging resources
and resolve. Investors, philanthropists, social
entrepreneurs, nonprofit leaders, business executives,
government officials, and students the world over will find
much to build on in these pages.

**Associative Democracy**

Economics for Business, 3rd edition, is an essential
introduction to economics, tailor-made for business
students. The text demonstrates the relevance of applying
economics principles to solve business problems, using a
unique business first approach. Key economic theories are
clearly explained within the context of modern business,
drawing on a wealth of contemporary examples to bring the
topics to life. The pedagogy allows students to consolidate
their learning and equips them with the economic tools to
confront real business situations.

**Reptiles and Amphibians, Their Care and Behaviour**

**Economics for Business**

Recent interest in how poultry are housed and managed in
order to ensure profitability, sustainability, and good
levels of animal welfare, are challenging issues that
commercial poultry keepers face, particularly where
legislation is bringing about legal requirements for
housing. This book compares and contrasts alternative
housing with conventional and traditional systems for
commercial poultry (laying hens, meat chickens, turkeys,
waterfowl and gamebirds) with regards to welfare, disease,
health, nutrition, sustainability and genotype-environment
Marketing Management

What kind of policy analysis is required now that governments increasingly encounter the limits of governing? Exploring the new contexts of politics and policy making, this book presents an original analysis of the relationship between state and society, and new possibilities for collective learning and conflict resolution. The key insight of the book is that democratic governance calls for a new deliberatively-oriented policy analysis. Traditionally, policy analysis has been state-centered, based on the assumption that central government is self-evidently the locus of governing. Drawing on detailed empirical examples, the book examines the influence of developments such as increasing ethnic and cultural diversity, the complexity of socio-technical systems, and the impact of transnational arrangements on national policy making. This contextual approach indicates the need to rethink the relationship between social theory, policy analysis, and politics. The book is essential reading for all those involved in the study of public policy.

Financial Accounting and Reporting (44-501638)

For the Principles of Marketing course. Ranked the #1 selling introductory marketing text, Kotler and Armstrong's Principles of Marketing provides an authoritative and practical introduction to marketing. The Tenth Edition is organized around a managing customer relationships framework that is introduced in the first two chapters, and then built upon throughout the book. Real world applications appear in every chapter and every vignette is new or has been updated. The text is complemented by an extensive ancillary package, from all new videos on VHS, online, and DVD to a new Presentation Manager CD-ROM for instructors.

Visible Learning and the Science of How We Learn
Off-label Prescribing

Political Writings, 1953–1993

Are You Ready to Succeed?

The Mariner's Handbook for Australian Waters (AHP20) is an official nautical publication providing mariners with important regulatory, procedural and environmental information affecting the planning and conduct of a voyage to or from Australian ports, or within Australian waters. It includes a summary of all relevant information from various Australian government agencies under the cover of one combined reference, with links to further information if required.

Netherlands Reports to the Seventeenth International Congress of Comparative Law, Utrecht 2006

Today’s medicines are regulated for their efficacy and safety and, once approved, they can be marketed for certain uses as justified by the data. Regulatory bodies in developed countries are constituted by legal statute and operate as parts of government, ostensibly in the interests of the people as patients. But once approved, medicines can be used for any purpose the prescriber thinks fit and appropriate for the patient. One in five prescriptions is therefore written outside regulatory purview. Off-label Prescribing looks into the corners of our medicated lives, where drug regulation runs up against medical practice, and concerns the use of a drug that has been approved for one use (in medical parlance, ‘indication’) being used for a different indication; alternatively, being used on a different set of patients from the ones it is approved for, or at a different dose. Usually the patient is unaware of what is going on, having not been informed by their doctor of this aspect of his or her prescribing choice. The book examines how and why this occurs, what the various medical professions have to say about it, and how pharmaceutical companies benefit by moving into this poorly regulated area. Off-label Prescribing pulls these complex issues together in
one volume, to highlight current practice, its advantages and weaknesses and how the author suggests practice should evolve in the future. It will therefore be of interest to all those who prescribe (and receive) medicines, combined with a greater objective to provide more transparency and discussion for professionals.

**The Musician's Hand**

**Alternative Systems for Poultry**

An electoral system is the most fundamental element of representative democracy, translating citizen's votes into representatives' seats. It is also the most potent practical instrument available to democratic reformers. This systematic and comprehensive study describes and classifies the 70 electoral systems used by 27 democracies — including those of Western Europe, Australia, Canada, the USA, Costa Rica, India, Israel, Japan, and New Zealand — for 384 national legislative and European Parliament elections between 1945 and 1990. Using comparative and statistical analyses of these systems, Arend Lijphart demonstrates the effect of the electoral formula used, the number of representatives elected per district, electoral thresholds, and of five other key features of electoral systems on the proportionality of the election outcome, the degree of multipartism, and the creation of majority parties. In the process he reveals that electoral systems are neither as diverser nor as complex as is often assumed. Electoral Systems and Party Systems represents the most definitive treatment of the subject since Rae's classic study in 1967, based as it is on more accurate and comprehensive data (covering more countries and over a longer time span), and using stronger hypotheses and better analytical methods. The unique information and analysis it offers will make it essential reading for everyone working in the field.

**International Human Resource Management**

Publisher Description

**Contemporary Sociological Theory**
This is the second edition of an introduction to all the financial and management accounting concepts and techniques required by the general business student.

**Electoral Systems and Party Systems**

Understanding the main concepts of IFRS Standards The fourth edition of Applying IFRS Standards explains the core principles of International Financial Reporting (IFRS) Standards. It also addresses the skills needed to apply the standards in business environments. The book begins with an overview of the International Accounting Standards Board (IASB) and how it establishes accounting standards. The general book topics are then covered in detail and include: income taxes, financial instruments, fair value measurement, property, inventories, employee benefits and more. Discussion questions, exercises and references are provided throughout the book.

**Due Diligence in Business Transactions**

Using conversations, cases and original sources, this work engages with the key themes and problems of public management.

**Municipal Benchmarking**

**The Novel: History, geography, and culture**

In Roads to Health, G. Geltner demonstrates that urban dwellers in medieval Italy had a keen sense of the dangers to their health posed by conditions of overcrowding, shortages of food and clean water, air pollution, and the improper disposal of human and animal waste. He consults scientific, narrative, and normative sources that detailed and consistently denounced the physical and environmental hazards urban communities faced: latrines improperly installed and sewers blocked; animals left to roam free and carcasses left rotting on public byways; and thoroughfares congested by artisanal and commercial activities that impeded circulation, polluted waterways, and raised miasmas. However, as Geltner shows, numerous administrative records also offer ample evidence of the concrete measures cities
took to ameliorate unhealthy conditions. Toiling on the frontlines were public functionaries generally known as viarii, or "road-masters," appointed to maintain their community's infrastructures and police pertinent human and animal behavior. Operating on a parallel track were the camparii, or "field-masters," charged with protecting the city's hinterlands and thereby the quality of what would reach urban markets, taverns, ovens, and mills. Roads to Health provides a critical overview of the mandates and activities of the viarii and camparii as enforcers of preventive health and safety policies between roughly 1250 and 1500, and offers three extended case studies, for Lucca, Bologna, and the smaller Piedmont town of Pinerolo. In telling their stories, Geltner contends that preventive health practices, while scientifically informed, emerged neither solely from a centralized regime nor as a reaction to the onset of the Black Death. Instead, they were typically negotiated by diverse stakeholders, including neighborhood residents, officials, artisans, and clergymen, and fostered throughout the centuries by a steady concern for people's greater health.

**The Dutch Navy of the Seventeenth and Eighteenth Centuries**

This book aims to develop the basic general management skills required to understand a business, sense the opportunities and problems that it faces, deal effectively with strategic decisions, and set in place the people and operations to implement those decisions.

**Leverage for Good**

In this book Paul Hirst makes a major contribution to democratic thinking, advocating "associative democracy"; the belief that human welfare and liberty are best served when as many of the affairs of society as possible are managed by voluntary and democratically self-governing associations.

**The Essential Public Manager**

The Musician's Hand - A Clinical Guide was the first book to focus on the specialised topic of the upper limb and hand in musicians: the conditions they suffer, the modified
assessment and treatment they require and the importance of prevention. Since its publication in 1998, scientific and clinical progress has been made in all these areas. The second edition of The Musician’s Hand has been completely revised under the editorship of hand surgeon Ian Winspur to reflect this expansion in our knowledge. The book opens with introductory chapters describing the principles of hand and arm pain as it is experienced by musicians, and summarising the problems associated with playing various instruments (woodwind, violin, piano, etc). Subsequent chapters cover the specific disorders seen in musicians, (Dupuytren’s, nerve compression syndromes, etc) describing the therapeutic solutions to each one and highlighting the key prevention strategies available. Closing chapters focus on related topics such as performance psychology and pharmacotherapy. Featuring contributions from world renowned performers such as Imogen Cooper and global experts in the field, The Musician’s Hand, Second Edition provides essential insight to upper limb problems in musicians, not only for surgeons, doctors and therapists, but for all students and teachers of performing arts medicine and to musicians themselves.

New Frontiers of Philanthropy

On publication in 2009 John Hattie’s Visible Learning presented the biggest ever collection of research into what actually work in schools to improve children’s learning. Not what was fashionable, not what political and educational vested interests wanted to champion, but what actually produced the best results in terms of improving learning and educational outcomes. It became an instant bestseller and was described by the TES as revealing education’s ‘holy grail’. Now in this latest book, John Hattie has joined forces with cognitive psychologist Greg Yates to build on the original data and legacy of the Visible Learning project, showing how it’s underlying ideas and the cutting edge of cognitive science can form a powerful and complimentary framework for shaping learning in the classroom and beyond. Visible Learning and the Science of How We Learn explains the major principles and strategies of learning, outlining why it can be so hard sometimes, and yet easy on other occasions. Aimed at teachers and students, it is written in an accessible and engaging style and can be read cover to cover, or used on a chapter-by-chapter basis for essay writing or staff development. The book is
structured in three parts – ‘learning within classrooms’, ‘learning foundations’, which explains the cognitive building blocks of knowledge acquisition and ‘know thyself’ which explores, confidence and self-knowledge. It also features extensive interactive appendices containing study guide questions to encourage critical thinking, annotated bibliographic entries with recommendations for further reading, links to relevant websites and YouTube clips. Throughout, the authors draw upon the latest international research into how the learning process works and how to maximise impact on students, covering such topics as: teacher personality; expertise and teacher-student relationships; how knowledge is stored and the impact of cognitive load; thinking fast and thinking slow; the psychology of self-control; the role of conversation at school and at home; invisible gorillas and the IKEA effect; digital native theory; myths and fallacies about how people learn. This fascinating book is aimed at any student, teacher or parent requiring an up-to-date commentary on how research into human learning processes can inform our teaching and what goes on in our schools. It takes a broad sweep through findings stemming mainly from social and cognitive psychology and presents them in a useable format for students and teachers at all levels, from preschool to tertiary training institutes.

Diseases and Injuries of Ballet Dancers

The use of performance information for real performance improvement is not as obvious as the ease with which the idea is embraced. What makes this noble endeavour so difficult? This dissertation assesses the relation between municipal benchmarking and organisational learning by looking at the role of the context in which the process and content of performance improvement are embedded. 'Municipal Benchmarking' offers an original analysis of the way performance improvement operates in the context of the public sector. The book gives an excellent overview of the theory and practice of benchmarking and has important implications for both policy makers and practitioners for the design and use of benchmarking in the public sector. From this study practitioners and public organisations at large can learn how to use and incorporate benchmarking results and hence gain greater depth and value of the benchmark.
Accounting in a Business Context

This "forum for self-exploration" ("New York Times") offers a unique perspective on career success that builds on unlocking personal creativity to achieve professional goals.

Principles of Marketing

Applying International Financial Reporting Standards 3rd edition has been thoroughly updated to reflect the numerous changes with the International Financial Reporting Standards (IFRS) as a consequence of the convergence program between the IASB and FASB. The expert, authoritative and reliable explanations of the author team continues and the textbook is widely referenced by both students and academics, and the accounting profession in countries that have adopted international accounting standards. The continuing focus of the third edition is to explain, interpret, analyse and illustrate the financial reporting requirements under IFRS. Each chapter contains numerous illustrative examples that present and explain concepts to ensure users gain a deep understanding of the reporting requirements and procedures, and attain the knowledge expectations of the accounting profession in respect to IFRS. The coverage of accounting standards has been expanded with the inclusion of new or thoroughly revised chapters on IFRS 9 Financial instruments, IFRS 11 Joint arrangements, IFRS 13 Fair value measurement, IAS 8 Revenue, IAS 24 Related party disclosures, IAS 33 Earnings per share and IAS 41 Agriculture. This textbook has been written for intermediate and advanced courses on financial accounting, at both undergraduate and postgraduate level.

Geography

PDQ Epidemiology will help to fill the considerable gap between the exact findings of the laboratory and the uncertain world of clinical medicine. By translating the terminology of epidemiology into easy-to-understand language, the underlying scientific methods begin to emerge and make sense. The third edition reflects the maturation of the field, which now encompasses much more than the "randomized, controlled trial." New sections explain techniques that have been introduced into the field since...
the previous edition, the section on RCT has been expanded, and updated examples have been incorporated. The section on measurement has also been brought into line with newer thinking on reliability and validity. Featuring unique examples titled Circular Reasoning and Anti-intellectual Pomposity Detectors (CRAP Detectors), the text helps the reader identify studies with basic flaws in design or reasoning. Special Features Complete coverage of all important concepts Easy-to-read, easy-to-grasp terms and concepts Perfect for board review

**Mariner's Handbook for Australian Waters (AHP20)**

**Management accounting**

Marketing Management, 11E, is a text and casebook written by Peter and Donnelly. It is praised in the market for its organization, format, clarity, brevity and flexibility. The goal of this text is to enhance students' knowledge of marketing management and to advance their skills in developing successful marketing strategies. The six stage learning approach is the focus text. Each section has as its objective either knowledge enhancement or skill development, or both. The framework and structure of the book is integrated throughout the sections of the new edition. The basic structure of the text continues to evolve and expand with numerous updates and revisions throughout.

**Roads to Health**

This book gives the reader an overview of current developments in Dutch Law. The contributions are from leading academics from different universities in the Netherlands. Amongst others the following topics are covered: . Dutch family law in the 21st Century: Trend-setting and straggling behind at the same time (M. Antonkolskaia and K. Boele-Woelki) . Mediation in the Netherlands: past - present - future (A. de Roo and R. Jagtenberg) . Mandatory and non-mandatory rules in Dutch corporate law (M. Meinema) . Limits and control of competition with a view to international harmonisation (P.-J. Slot) . Rights of minority shareholders in the Netherlands (L. Timmerman and A. Doorman) . Constitution,
international treaties, contracts and torts (M. van Empel and M. de Jong). Human rights and private corporations: A Dutch legal perspective (S. van Bijsterveld). The rights of the embryo and the foetus under Dutch law (V. Derckx and E. Hondius). Regulating electronic commerce in the Netherlands (C. Prins)

The Child and the Curriculum

Conducting business across national borders is nothing new; the Knights Templar were banking internationally as long ago as 1135. But modern globalization processes raise different challenges, and as the world becomes smaller and labour movements more common, an international understanding of human resource management is essential. The second edition of International HRM provides a fully updated and revised analysis of this important area. Its innovative, multi-disciplinary approach allows a holistic picture to emerge in which key issues are assessed from organizational, individual and societal perspectives. The collection is divided into three parts: the contemporary internationalization context the management of international employees strategic issues facing international HR managers. Supported by new research, and including work from eminent writers in the field, this book discusses issues as diverse as the relative absence of women in international work, the ethical merits of localization, and the context faced by organizations like the United Nations. It is a valuable tool for all students, researchers and practitioners working in international business and human resource management.

Ice Observations

Now in a fourth edition, this standard student reference has been totally revised and updated. It remains the definitive introduction to the history, philosophy, and methodology of human geography; now including a detailed explanation of key ideas in human geography's post-modernist and post-structuralist 'turns'. The book is organized into six sections: What is Geography?: an introduction to the discipline, and a discussion of its organization and basic research approaches, informed by the question 'what difference does it make to think geographically?' Foundations of Geography: an examination of geography from
Antiquity to the 1950s, with a special focus on human/environment relation. Geography 1950-1980: a critical review of the development of geography as a spatial science. Paradigms and Revolutions: an analysis of paradigm shifts in geography, introducing students to key debates in the philosophy of science. Positivism and its Critics: a detailed discussion of positivism, critical theory, humanistic geography, behavioural geography, and structuralism. New Trends and Ideas developing critical responses: structuration theory, realism, post-structuralism, post-modernism, feminism and actor-network theory. This text explores complex ideas in an intelligible and accessible style. Illustrated throughout with research examples and explanations in text boxes, questions for discussion at the end of each chapter and a concept glossary, this is the essential student companion to the discipline.

Strategic Analysis and Action

This comprehensive collection of contemporary sociological theory is the definitive guide to current perspectives and approaches in the field, examining key topics and debates in the field. Collects the most representative material available on topics such as symbolic interactionism, phenomenology, structuralism, network theory, critical theory, feminist theory, and the debates over modernity and postmodernity. Includes examinations of the work of Foucault, Giddens, and Bourdieu. A new section for this edition opens up the debate on power and inequality. Thematically organized.

Applying IFRS Standards

The co-operation between the Netherlands Nationaal Archief and the Arsip Nasional Republik Indonesia has resulted in this catalogue of fifteen archives of VOC (Verenigde Oostindische Compagnie) institutions in Jakarta. The VOC records are included in UNESCO’s Memory of the World Register.

Applying International Financial Reporting Standards

The medical achievements of the post-war years rank as one
of the supreme epochs of human endeavour. Advances in surgical technique, new ideas about the nature of disease and huge innovations in drug manufacture vanquished most common causes of early death. But, since the mid-1970s the rate of development has slowed, and the future of medicine is uncertain. How has this happened? James Le Fanu's hugely acclaimed survey of the 'twelve definitive moments' of modern medicine and the intellectual vacuum which followed them has been fully revised and updated for this edition. The Rise and Fall of Modern Medicine is both riveting drama and a clarion call for change.

Maandblad voor bedrijfsadministratie en-organisatie

Maurice Blanchot is a towering yet enigmatic figure in 20th-century French thought. Both his fiction and his criticism played a determining role in how postwar French philosophy was written. This volume collects his political writings from 1953 and 1993.
